

calcTranslator/translator.cpp

```
graph TD; A[calcTranslator/translator.cpp] --> B[iostream]; A --> C[fstream]; A --> D[vector]; A --> E[string];
```

A diagram illustrating the dependencies of the file `calcTranslator/translator.cpp`. The file is represented by a gray rectangular box at the top. Four blue arrows originate from the bottom of this box and point to four separate white rectangular boxes arranged horizontally below it. These boxes are labeled `iostream`, `fstream`, `vector`, and `string` from left to right, indicating that the translator.cpp file includes or uses these standard library components.

iostream

fstream

vector

string
